EDUCATION

Invertis University Bareilly, Uttar Pradesh
Bachelor of Technology in Computer Science April 2023 – May 2027
Expected Graduation: May 2027 Current Year: 3rd

TECHNICAL SKILLS

Programming Languages: Java, Python, HTML, CSS, JavaScript
Development: Front-End Development, Web Development, Software Development
Tools & Technologies: Git, Data Visualization, Business Analysis
Core Competencies: Data Structures, Algorithms, Object-Oriented Programming, Problem Solving
Areas of Interest: Artificial Intelligence, Business Analytics, FinTech, Data Analysis

PROFESSIONAL EXPERIENCE

Data Analyst (Virtual Experience) *August 2025*
Forage – Tata Consultancy Services Simulation *Bareilly, Uttar Pradesh*

- Completed data visualization simulation for Tata Consultancy Services, creating executive-level dashboards
- Prepared strategic questions and analysis frameworks for C-suite client meetings
- Developed data-driven visual analytics to support executive decision-making processes
- Demonstrated proficiency in translating complex datasets into actionable business insights

ESG Analyst (Virtual Experience) *August 2025*
Forage – Tata Consultancy Services ESG Simulation *Bareilly, Uttar Pradesh*

- Conducted comprehensive assessment of client sustainability requirements and ESG framework needs
- Performed comparative analysis evaluating multiple TCS solutions against client sustainability goals
- Created detailed fitment matrix presenting tailored ESG solutions to address specific client challenges
- Applied analytical thinking to align technology solutions with environmental and social governance standards

Web Development Team Member *2024 – Present*
Fresher Jobs and Hiring Alerts *Remote*

- Developed responsive web solutions using Python, HTML, and CSS for high-traffic job portal platform
- Collaborated with cross-functional development team to deliver projects on schedule
- Built scalable systems aligned with organizational objectives, ensuring optimal performance
- Implemented best practices in web development to enhance user experience and system reliability

PROJECTS

Data Visualization Dashboard *Python, Data Analytics*

- Designed and implemented interactive dashboards for business intelligence and executive reporting
- Utilized Python libraries for data processing, analysis, and visualization of complex datasets

Web Application Development *HTML, CSS, JavaScript, Python*

- Built full-stack web applications with responsive design and optimal user interface
- Implemented front-end functionality using modern web technologies and frameworks

CERTIFICATIONS & ACHIEVEMENTS

- **What Is Business Analysis?** – Professional Certification
- **TCS Data Visualization Job Simulation** – Forage (August 2025)
- **TCS ESG Job Simulation** – Forage (August 2025)
